

THALISSON PEREIRA

Senior .NET Backend Developer | C# | ASP.NET Core | Web APIs

London, ON, Canada N6K 0E8 | thalisson_21@icloud.com | +1 519-670-8006 | [linkedin.com/in/thalissonpereira01](https://www.linkedin.com/in/thalissonpereira01) | <https://github.com/Thaalisson>

PROFESSIONAL SUMMARY

Senior Software Developer with 13+ years of experience in backend development using C# and .NET technologies. Experienced in building scalable enterprise applications and high-performance REST APIs across telecom, finance, and logistics. Strong background in ASP.NET Core, Web API, SQL Server, and Clean Architecture. Experienced in designing scalable API-driven systems and backend architectures. Proven track record of improving system performance by up to 40%, reducing rework by 30%, and delivering reliable, maintainable backend solutions.

TECHNICAL SKILLS

Backend: C#, .NET, ASP.NET Core, Web API, REST APIs

Databases: SQL Server, PostgreSQL

Architecture: Clean Architecture, DDD, SOLID, API-driven systems

Cloud: AWS (S3, CodeCommit - basic)

Tools: Git, CI/CD, Agile (Scrum, Kanban)

Frontend: React, TypeScript (API integration)

Additional: ADO.NET, MVC, Performance Optimization, SQL Tuning.

Legacy: Visual Basic 6, Asp.net Classic.

PROFESSIONAL EXPERIENCE

Software Developer – Opid Technologie | May 2022 – Present | Tillsonburg, ON, Canada

- Designed, developed, and maintained backend services and REST APIs supporting enterprise applications, improving issue resolution time by 15%.
- Worked with API-driven architectures and backend system design and integrated backend services with React-based frontends.
- Applied Clean Architecture principles to improve maintainability, scalability, and system structure.
- Built reporting features that increased data visibility and improved decision-making speed by 25%.
- Improved backend performance and API response efficiency through optimized data handling and architecture improvements.
- Reduced rework by 30% through improved system design and collaboration with cross-functional teams.

Software Developer – MFMti | Oct 2013 – May 2022 | São Paulo - Brazil

- Developed backend systems using C#, ASP.NET MVC, and SQL Server for enterprise clients including Claro, Boticário, Jequití, and PAN Bank.

- Built RESTful APIs and Web Services, improving system integration and reducing response times by 20%.
- Designed and optimized complex SQL queries, stored procedures, and database structures, improving performance by 30%.
- Participated in system design, requirements analysis, and technical decision-making in collaboration with clients and cross-functional teams.
- Migrated legacy systems to .NET Core, improving scalability, cross-platform compatibility, and reducing downtime by 20%.
- Developed and maintained applications across multiple environments (Web, APIs, Windows Services), ensuring system reliability and data integrity.
- Worked in Agile environments (Scrum/Kanban), contributing to faster delivery cycles and improved team efficiency.

KEY PROJECTS

- CRM System (Claro): Increased recovery rate by 65% using C#, SQL Server, ASP.NET.
- Billing Platform (Jequiti): Improved billing efficiency by 34% using ASP.NET MVC and REST APIs.
- Scheduling System (TFT Global): Improved workforce efficiency by 40% through backend services.
- No-Code Page & UI Builder Platform (Opid Technologies): Built a no-code platform using React.js, React Native (Expo), TypeScript, and Tailwind CSS, enabling visual page creation via JSON-based configurations. Reduced layout creation time by 50% and development rework by 35% through versioned layouts and real-time preview.

EDUCATION

Technologist in Systems Analysis and Development São Judas University – São Paulo, Brazil (2019–2021)

LANGUAGES

English (Advanced) | Portuguese (Native)
